

LLQP Stakeholder Meeting

Toronto, October 27, 2015

Agenda

1. Welcome & Agenda Review
2. Project update & timelines
3. Implementation plan
4. Funding
5. Next meeting

2 Project update: e-Tablets

- Selected model: TBC in the coming days
- User guides to be developed – training options being considered (on-line demo)
- Hands on training recommended as part of LLQP program

2 Project update: sample questions

- First samples published early October
 - One question per competency component (a little over a dozen in total)
 - Information provided: question, answer, explanations and references (Curriculum and exam prep. material)
- Additional samples to be released in the coming weeks (before year end)
 - One question per competency sub-component (about a dozen/module, or 40% of questions)

2 Project update: other tools online

- Exam validity control mechanisms
 - Detailed report covering material presented at earlier Stakeholder meetings
- Question drafting and review guidelines
 - Tool used for CISRO SME mandates
 - Potential tool for Course Providers to assist in development of certification exam questions
- FAQs currently being developed based on Stakeholder feedback (TBC)

3. Implementation plan

- 3.1 Transition
- 3.2 Registration process

3.1 Transition

- 3.1.1 Historical background
- 3.1.2 Basis for CISRO decision
- 3.1.3 Selected transition model
- 3.1.4 Length of transition period

3.1.1 Historical background

- Significant changes brought by original LLQP
- Reduced pass rate as safety net
- Satisfactory results rendering transitional measure unnecessary

3.1.2 Basis for CISRO decision

- Safety net requested by Stakeholders – options considered include
 - Reduced pass rate
 - Pilot in select jurisdictions only
 - Temporary compensatory marking

3.1.2 Basis for decision (cont.)

- Harmonized LLQP bringing less significant changes
 - Similar breadth of material
 - Anticipation that reduced pass rate unnecessary
- Harmonized LLQP bringing changes nonetheless
 - New exam preparation material
 - New exam questions
 - New marking approach

3.1.3 Selected transition model

- Modular marking in Quebec (no change to current model)
- Pilot in Alberta
- Compensatory marking option in other jurisdictions (TBC) for transition period

3.1.4 Length of transition

- Sufficient time to gather statistically significant data
 - 1,000 writes on 3 sets of formats per module
 - Ongoing adjustments by AMF
 - Independant psychometric report
 - 45-day notice period of end of transition following publication of expert report

3.2 Registration process

- Possibility of registering before certification to be confirmed with jurisdictions

4. Funding

- Licence fee formula: development costs and annual maintenance costs divided by number of students over 5 years

4.1 Licence fee formula

Development costs	Original Forecast	Actuals/reviewed projections
Salaries and office expenses	\$745,000	\$497,755
Occupational workshops	\$190,000	\$95,725
Curriculum	\$50,000	\$18,652
Study Material	\$2,060,000	\$893,727
Exams (incl. tablets)	\$720,000	\$848,300
Licence Agreement	\$10,000	\$8,369
Totals	\$3,775,000	\$2,362,528

5. Next meeting

- Suggested timing: TBC
